

StepsWeb Main Course

The main literacy Course consists of Levels 1 – 16, which cover reading/spelling ages from approximately 6 years to spelling ages 15 years and above.

The main Course is designed for learners who have reached the following milestones:

- **Know their letter-sounds**
- **Know common th, ch, sh, wh, ck, ng**
- **Have a basic sight vocabulary**
- **Can confidently decode/encode regular CVC words**

Learners who have not yet reached these milestones should complete the Foundation Course before starting on the main Course. New students below 6 years of age will automatically be placed on the Foundation Levels. Students over 6 will take the Placement Test when they first log into StepsWeb. This will analyse their literacy knowledge and allocate them to the correct Level of the Foundation Course or main Course.

This is a reference document giving the main A, B and C List –s for the main Course (Levels 1 – 16). It should be read in conjunction with the Scope & Sequence document.

Note: This document lists only the phonic/morphology content, not aspects such as phonological awareness.

Please note that the **A and B Lists** are the core phonic content/structured literary progression, but the **C Lists** in **Levels 1 – 4** often include reading words which are introduced in the story materials. Activities are carefully designed so that students are never asked to independently encode or decode irregular words which have not been previously taught.
